

Nestlé Malta Environmental Policy

Safety & Health
Environmental
Sustainability

Our purpose

Nestlé's purpose is enhancing quality of life and contributing to a healthier future. Our approach creates value not only for our business, but also for individuals and families, for our communities and for the planet. *The bigger ambition for Nestlé worldwide is to strive for zero environmental impact in our global operations by 2030. Nestlé Malta supports that goal and is committed to operate more sustainably and efficiently to meet these environmental challenges.*

Our commitment

Nestlé Malta is committed to:

- Comply fully with all applicable legal environmental requirements and our internal requirements
- Continuously seek solutions to recover waste from our consumers and recycle for alternative uses.
- Minimize waste generated from our own activities and divert for re-use and recycling
- Reduce electrical and fossil-fuel consumption and adopt sustainable energy strategies
- Set out systems and processes to ensure that environmental risks are managed consistently;
- Continually improve the environmental performance of our activities and prevent pollution through the Environmental Management System which satisfies the requirements of ISO 14001.
- Promote our environmental policies, principles and continuous improvement in environmental performance amongst our people, interested parties and service providers across the supply chain and to lead by example.

We will provide leadership and resources to ensure that this commitment is fully integrated throughout our Company.
